EDUCATION

Self learning period

from march 2024 to date

I've been studying independently web development through different bootcamps and platforms: Udemy, EPAM, 42 Prague, etc.

Escuela Profesional de Danza de Mazatlán

2012-2016

I majored in contemporary dance in an Arts School/University in Mexico.

CESPA Morelos

2010-2012

I got my high school degree with focus in humanities.

WORK EXPERIENCE

Mother

2021 to date

I relocated to the CR with my Czech husband when I was pregnant. I focused in my maternity the first 3 years. When I finally had more free time and mental space I started studying web development.

Dance and English teacher/ Entertainment Staff

2016-2021

I gave English and dance classes to kids, beginner and intermediate level via Zoom. I was a substitute teacher for ballet, stretching and contemporary dance for different schools and academies in Cuernavaca , Mexico. I worked at Azul Beach Resort Riviera Cancun and was in charge of the hotel's entertainment activities such as MC for the night shows, waterpolo, volleyball, zumba, etc.

MY TOP 2 WEB DEVELOPMENT PROJECTS

Churn Insight (December 2025- January 2026)

This was the result of my first on-line Hackathon. I learned more about teamwork and communication than anything else. I was part of the full stack team and we communicated with the data science team through our REST API built with Spring and FastAPI. It predicts the clients likely to churn.

My Yearly Movies and Series Reviews (2025)

A blog-like website built with React, Spring Boot, and MySQL. I share my personal reviews of movies and TV series. It's deployed via Render using a Dockerfile and PostgreSQL through Supabase, so there are some differences with the repository version. I just tried to put everything I've been learning in one project. It's simple but I'm proud to say I did it myself without following a tutorial. It may take a few minutes to load.
