MY TOP 2 WEB DEVELOPMENT PROJECTS

Salon na Jahodě (2025)
This was the first webpage I handled for a client. I did it from scratch, the design, the code and the deployment. It's pure HTML, CSS and JavaScript.

My Yearly Movies and Series Reviews (2025)
A blog-like web app built with React, Spring Boot, and MySQL. I share my personal reviews of movies and TV series. The deployed version uses PostgreSQL instead and uses a DockerFile so there are some differences with the repository version. It may take a few minutes to load since it's hosted in a free tier plan.
